Questions

CSCE 322

Questions

Goals

- Full-Time Lecturer in Computer Science & Engineering
Teaching CSCE 322 and CSCE 310 (and CSCE 155N on Occasion)
- (Almost) Full-Time Ph.D. Student in Teaching, Learning and Teacher Education
- M.S. in Computer Science from the University of Central Florida (2013)

- First GTA Assignment: Discrete Math, 218 Students (55 per Recitation Section)
0 UTAs, 1 Other GTA

Questions

Goals

65

- SRS (Student Response System) at UNL

<https://its.unl.edu/services/srs/>

- Available in all General Purpose (GP) Classrooms

<https://its.unl.edu/services/srs/iclicker-channel-assignments-gp-rooms/>

- Free Instructor Clickers and Base Stations available from 472-5511 or classrooms@unl.edu

- <https://instructor.reef-education.com/#/instructor/courses/active>
- Software available in every GP classroom
- Link with Canvas Class through “iClicker Sync” in Canvas
- (In Theory) Syncs to Canvas Gradebook after every session
Can always export and upload to Canvas manually

+ New Access Token

Feature Options

34

65

Request Course Information

- ```
curl -H "Authorization: Bearer MY_ACCESS_TOKEN" -X GET https://canvas.unl.edu/api/v1/courses
```

**GET** all information about all courses I'm affiliated with
- **Everything Returned in JSON Format**  
JavaScript Object Notation
- **JSON - Introduction**
- **Courses with the Canvas API**
- ```
curl -H "Authorization: Bearer MY_ACCESS_TOKEN" -X GET https://canvas.unl.edu/api/v1/courses/61126/assignments
```

Get all information about all assignments in the Summer 2019 offering of CSCE 235 (Results are **Paginated**)

Useful to get Canvas IDs for Assignments (match with Names of Assignments)
- ```
curl -H "Authorization: Bearer MY_ACCESS_TOKEN" -X GET https://canvas.unl.edu/api/v1/courses/61126/students
```

Get all information about all students in the Summer 2019 offering of CSCE 235
- ```
curl -H "Authorization: Bearer MY_ACCESS_TOKEN" -X GET https://canvas.unl.edu/api/v1/courses/61126/students/151211
```

Get all information about user (student) in the Summer 2019 offering of CSCE 235 with this **Canvas ID**
- ```
curl -H "Authorization: Bearer MY_ACCESS_TOKEN" -X GET https://canvas.unl.edu/api/v1/courses/61126/users/92368
```

**SIS: Student Information System ID** is the NUID

# Modify Course Information

- Almost anything can be modified through the Canvas API
  - **Uploading files** is a bit of a process
- We'll focus on updating grades

■

```
curl -X POST -F "grade_data[151211][posted_grade]=0" -H "Authorization: Bearer MY_ACCESS_TOKEN" https://canvas.unl.edu/api/v1/course
```

## Canvas API Example for Grading Multiple Submissions

- **POST** (or **PUT**) Something to/on Canvas
- Change grade of student with Canvas ID 151211 on assignment with Canvas ID 486573 in Course with Canvas ID 61126 to a 0
- Test Student on Programming Assignment 01 in the Summer Offering of CSCE 235

49 **Questions**

CSCE 322

Questions

Goals

65

- Demonstrate Understanding of How Specific Algorithms or Data Structures Work
- Solve Specific Instances of Problems from Programming Assignments

**Question 6** (16 points)

Construct a 2-3 tree for the list `s,v,i,t,z,e,r,l,a,n,d`. Use alphabetical order of the letters for comparison and insert them (in the order provided) starting with the empty tree.

## Question

Q6 5/5.0

|                   |   |
|-------------------|---|
| Fully Graded:     | ✓ |
| Grade Overridden: | ✗ |
| Parts Ungraded:   | 0 |

View ☒ Original Response ☐ Unfiltered ResponseHow many ways are there to choose three (3) names from **avery**, **schorr**, **othmer**, **scott**, and **nebraska** so that no more than two (2) names contain an e?

| Your response | Correct response |
|---------------|------------------|
| 9             | 9                |

✓ Grade: 1/1.0 ☒

✓ Total grade: 1.0×1/1 = 100%

Q7 18/18.0

|                   |   |
|-------------------|---|
| Fully Graded:     | ✓ |
| Grade Overridden: | ✗ |
| Parts Ungraded:   | 0 |

View ☒ Original Response ☐ Unfiltered Response

If a 2-3 tree is created from the letters in

workmanship

such that letters are inserted in the order they appear in the word and are compared by their order in the alphabet, select the nodes that hold **w**, **o**, **s**, and **h**.

For reference, the alphabet is

abcdefghijklmnopqrstuvwxyz

✓ Grade: 1/1.0 ☒

✓ Total grade: 1.0×1/1 = 100%

**Question 5** (16 points)

Inserting values 4, 2, 0, 9, 7, 8, 3, 1, 5, 6 into an AVL tree results in the following tree (after inserting 6).

This tree violates the definition of an AVL tree. Show the resulting tree after completing a *double left-right rotation (LR-rotation)* on this tree.

Q5 18/18.0

|                   |   |
|-------------------|---|
| Fully Graded:     | ✓ |
| Grade Overridden: | ✗ |
| Parts Ungraded:   | 0 |

View ☒ Original Response ☐ Unfiltered Response

After inserting the values 5 4 3 8 9 7 into an AVL tree (in that order), the tree looks like this

If the values 6 0 2 1 are additionally inserted (in that order), choose the nodes that correspond to 3, 5, 1, and 2.

Your response

Correct response

Grade: 1/1.0

**Question 2** (16 points)  
Given the flow network below

What is the maximum flow that can be achieved from the source to the sink?

Q8 15/15.0

|                   |   |
|-------------------|---|
| Fully Graded:     | ✓ |
| Grade Overridden: | ✗ |
| Parts Ungraded:   | 0 |

View ☒ Original Response ☐ Unfiltered Response

Select the edges (numbers) that will make up the minimum spanning tree for this graph.

| Your response  | Correct response |
|----------------|------------------|
|                |                  |
| ✓ Grade: 1/1.0 |                  |

✓ Total grade: 1.0\*1/1 = 100%

CSCE 310

Questions

CSCE 322

Questions

Goals

**Question 1** (12 points)

Consider the following pseudocode:

```
1 x : integer

3 procedure set_x(n : integer)
4 x = n

6 procedure print_x
7 write_integer(x)

9 procedure first
10 set_x(3)

12 procedure second
13 print_x
14 set_x(9)
15 first

17 procedure third
18 x : integer
19 x = 8
20 second
21 print_x
22 first

24 set_x(1)
25 first
26 print_x
27 third
28 second
29 print_x
```

(a) What does this program print if the language uses static scoping?

(b) What does it print if the language uses dynamic scoping with deep binding?

(c) What does it print if the language uses dynamic scoping with shallow binding?

```
x : integer

procedure set_x(n : integer)
 x = n

procedure print_x
 write_integer(x)

procedure foo(S,P : function, n : integer)
 x : integer = 5
 if n in {2,4}
 x = n
 else
 S(n)
 if n in {2,7}
 write_integer(x)
 else
 P

set_x(0); foo(set_x,print_x,2)
set_x(8); foo(set_x,print_x,5)
set_x(4); foo(set_x,print_x,7)
set_x(3); foo(set_x,print_x,4)
```

What does this program print if the language uses static scoping?

- (a) 0
- (b) 2
- (c) 3
- (d) 4
- (e) 5
- (f) 7
- (g) 8

**Question 2** (12 points)

Consider this grammar for prefix notation

$$\begin{aligned} \textit{EXPR} &\rightarrow \textit{NUM} \mid \textit{ID} \mid -\textit{NUM} \\ \textit{EXPR} &\rightarrow \textit{OP} \textit{EXPR} \textit{EXPR} \\ \textit{NUM} &\rightarrow 0-9 \\ \textit{ID} &\rightarrow \mathbf{a-z} \\ \textit{OP} &\rightarrow + \mid - \mid * \mid / \end{aligned}$$

(a) Provide the parse tree for the input  $+ - 4 * 2 y$ , starting with rule *EXPR*.

(b) Is this language ambiguous? If so, provide an alternate parse tree for  $+ - 4 * 2 y$  to prove it.  
If not, why not?

**Question 5: (12 points)**

Consider this grammar for prefix notation

```
expr -> number | id | -number
```

```
expr -> op expr expr
```

```
number -> 0-9
```

```
id -> a-z
```

```
op -> + | - | * | /
```

Select the valid parse tree(s) for the input (starting with the expr rule)

$+ - 4 * 2y$

(a)
